The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of \$0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director Division of Water Room W264 402 West Washington Street Indianapolis, Indiana 46204

For a petition to be considered valid it must:

- 1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
- 2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
- 3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
- 4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water Room W264 402 West Washington Street Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

Application # : FW-21775

Stream : Wabash River

Applicant : Hannum, Wagle & Cline Engineering

Dick R Weigel

5958 West 71st Street Indianapolis, IN 46278

Description

: A new 60" interceptor sewer will be placed under the river to convey sewage from the north side to the south. The line will have a minimum of 3' of cover between the pipe and the riverbed. The open trench construction method will be used. In addition, a 42" storm sewer outfall and new concrete headwall will be constructed along the south riverbank approximately 65' east of the proposed sewer line crossing and approximately 40' east of the existing outfall structure. Riprap will be placed at the base of this new headwall for energy dissipation. Also, nine (9) existing outfall structures located along the north river bank will have new headwalls constructed at the ends of the existing pipes. During the construction phase, a temporary access drive consisting of riprap will extend from the bank to the middle of the channel. The access drive will be constructed in two phases, from the north bank to the middle of the channel and then from the south bank to the middle of the channel. No more than 1/2 of the river channel flow will be blocked at any given time. Also, a section of an existing retaining wall will be removed along the south bank in order to construct the access drive from the south during the sewer installation. The section of retaining wall removed will be replaced once construction is complete. Details of the project are contained in information received electronically at the Division of Water on March 8, 2002, and in information and plans received at the Division of Water on March 21, 2002, March 26, 2002, April 15, 2002, May 1, 2002 and June 11, 2002.

Location

The sewer crossing is approximately 2200' downstream (southwest) of the State Road 19 stream crossing, the new outfall headwalls are located along the north river bank beginning at the east side of the Wallace Avenue river crossing and continuing downstream (southwest) in eight additional locations for approximately 1.7 miles

at Peru, Peru Township, Miami County

Application # : FW-21853

Stream : Van Run

Applicant : CMS Panhandle Eastern Pipeline Company

James M Padgett

PO Box 38

Zionsville, IN 46077-0038

Description : Approximately 30' x 36' and 70' x 90' of Ecroflex Articulating Grout Mats will be

placed on the streambed, in separate locations, to protect a 24" and 22" exposed pipelines from further erosion. Sand bag cushions will be placed beneath the grout mats and above the exposed pipeline for protection. Clean fill will be used on site to bring the stream back to the pre-eroded conditions. Details of the project are contained in information received electronically at the Division of Water on May 8, 2002 and in information and plans received at the Division of

Water on May 10, 2002, May 13, 2002 and June 6, 2002.

Stream : West Fork White River

Applicant : Ricker Oil Company

Jeff Holon

2508 Central Avenue Anderson, IN 46016-5124

Description : A portion of a 200' x 190' area will be filled in the south (left) floodway of the river

for the reconstruction of an existing convenience store and parking lot. The fill will vary in depth with a maximum height of 3.8'. It will be set approximately 550' to 600' back from the top of the bank. The fill's finished elevation will be 841.0', NGVD. The convenience store and parking lot will be constructed on top of the completed fill. The fill material will be obtained off site. Details of the project are contained in information and plans received at the Division of Water on May 31,

2002.

Location : Along the south bank of the river on the east side of Madison Avenue, between

Stream : Trail Creek

Applicant : United States Coast Guard Station Michigan City

MK1 Paul Rotolo

10 On The Lake (Washington Park) Michigan City, IN 46360-3292

Description : An existing 90' delapidated timber retaining wall located in front of the existing

United States Coast Guard Station will be encapsulated with new steel sheet piling. In addition, a new 216 square foot floating dock will be constructed within the existing boat slip. It will be anchored to the slip with the use of 12" steel pipes filled with concrete. A 20' long gangway will connect the bank to the floating dock. Along the waterfront, existing sidewalks and guardrails will be replaced. Details of the project are contained in information and plans received at the Division of

Water on June 3, 2002.

Location : At the United States Coast Guard Station south of the Washington Park Marina

Lake : Pine Lake

Applicant : Peter Korrellis

5 Elm Place

LaPorte, IN 46350-2245

Description : Approximately 34 cubic yards of debris will be removed from the lake bed by

dredging along the applicant's 60' frontage to a maximum depth of 4.5' below the legal lake level. The dredging will start approximately 10' from the shoreline and extending a maximum of 30' lakeward of the shoreline. An excavator will remove the debris. All excavated material will be deposited in an upland site. Also, a 30' x 20' underwater beach will be constructed along 30' applicant's 60' frontage by placing a uniform 6" layer of pea gravel on the lakebed. Details of the project are contained in information and plans received at the Division of Water on April 26,

2002, May 13, 2002 and May 31, 2002.

Lake : Jimmerson Lake

Applicant : Don Garton

555 Lane 275 Jimmerson Lake

Angola, IN 46703-9479

Description : As depicted in the sketch by Neil Ledet, Department of Natural Resources,

Division of Fish and Wildlife, a bioengineered seawall will be constructed along approximately 150' of the 200' lake frontage. The existing railroad tie seawall will remain in place. Pea gravel and top soil will be placed in the voids around the railroad tie wall. Glacial stone will be placed at the base of the railroad ties for toe protection. Various wetland plants be planted every 3'. A second row of glacial stone will be placed approximately 1.5' lakeward of the existing shoreline. This row of stone will be approximately 1.5' wide and 1' high. In lieu of the second row of glacial stone, small groups of stone will be placed lakeward to protect the new plantings. Details of the project are contained in information and plans received

at the Division of Water on May 28, 2002.

Location : 555 Lane 275, lot 27 and 28, Ramblin Acres
